

DRY SUIT SPECIALTY CLASS

Just because the water's cold doesn't mean you have to be. Get out of that cold wetsuit and get into a warm comfortable drysuit. Drysuits have evolved into one of the most practical pieces of diving equipment to own. People diving the new fabric dry suits have found that it is easier to get in and out of the suit and that freedom of movement is increased. Because the suits are thin and flexible you can dive your dry suit in any water condition. You no longer have to suffer from cold water while trying to enjoy the clear early spring dives and if you enjoy diving the Caribbean you will find them very enjoyable there also. Drysuits in other words have evolved into the universal suit. DRY SUIT SPECIALTY CLASS is part of your advanced training program and is completed into two parts;

Part 1, theory and pool practice

Part 2, open water dives, can be completed during

OPEN WATER SCUBA class, or any of our dive trips.

This class qualifies as one of the specialties necessary for advancing to certification levels 2 or 3.

A drysuit like any diving equipment does require some practice to become proficient in its use and care. This class gives you an overview of different types of drysuits and insulation options, so you can see how easily, they will work with your style of diving. Plus you will learn, diving techniques and how to care and maintain a drysuit system.

Included in the cost of the class:

SSI DRY SUIT SPECIALTY CERTIFICATION, diploma, and drysuit equipped with dry glove rings, hood and insulation for the pool and open water. Two open water dives, during OWD Class or during one of our trips.
