NITROX

LEVEL II

SSI SPECIALTY CLASS

Even though NITROX has been used by the NOAH and NAVY divers for over fifty years, the sport diving industry has come to accept NITROX in the last 20 years as a safe gas for the recreational SCUBA diver.

NITROX IS BECOMING READILY AVAILABLE AT DIVE STORES AND RESORTS THROUGHOUT THE WORLD.

Just like any new technology there have been misunderstandings about NITROX gas and how it will be used and misused by sport divers.

LEARN ABOUT NEW EQUIPMENT!

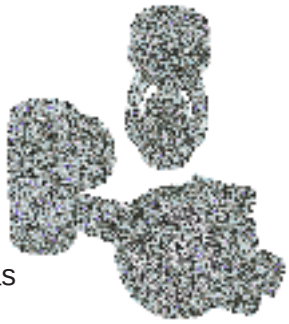
NITROX for normal sport diver depths is definately a safer gas to use, with less uptake of nitrogen and faster offgasing during safety stops. You will be able to stay down longer, and get back into the water quicker between dives as well as do more dives per day. During this class you will find out how simple it is to incorporate new ideas and technology with your existing diving system.

Many of your present diving activities will be inhanced with the added safety and longer bottom times. Think how much more fun you will have taking pictures and exploring the underwater world!

NITROX DIVE COMPUTER

LEARN NEW TERMINOLOGY

This class is designed to enhance dive planning skills that you already have and incorporate NITROX into them. The class is taught in one session where you will learn dive planning, Enriched Air Cylinder filling protocols and practice gas analysis procedures. The class has an optional two open water dives that can be completed on any of our trips with a NITROX instructor. These dives will allow you to use this class as a SPECIALTY class towards Advanced Open Water certification. You will also receive a credit for two rental NITROX tanks. This way you can practice your NITROX dive planning and have an opportunity to dive NITROX!



NITROX COMPATABLE REGULATOR

Sounds too good to be true? Sign up now for the new specialty class and learn about the gas that will make your diving safer.

CLASS COST $114.00
deposit $25
